Summary

Computer Science, IT and Multimedia Student development and highly motivated in seeking out new techniques and technologies to improve human's life

Education

Higher institute of computer science (ISIMA)   **Mahdia, Tunisia**
National Licence Degree in Computer Science   *9/2023 – present*

Experience

Software Development Intern   **Taboulba, Tunisia**
SYNC   *06/2024 – 8/2024*
○ Integrated and utilized various APIs to enhance application functionality.
○ Developed and maintained the front-end of web applications using React and Angular.
○ Built and optimized the back-end using Laravel PHP framework.
○ Designed and implemented e-commerce websites using PrestaShop and Shopify, including a home appliance store.
Technologies used: PHP, Angular, JavaScript, React, SQL.

Key Achievements

Enhanced Website Performance: Improved website load times by optimizing front-end code, resulting in a 25% reduction in page loading speed.

API Integration Success: Successfully integrated complex third-party APIs to enhance application functionality, ensuring seamless data flow and user experience.

Codebase Efficiency: Refactored and modularized legacy code, improving maintainability and reducing development time for future updates by 20%.

Collaboration Impact: Collaborated with a team of 5 developers to complete a high-priority e-commerce project within a tight 2-month deadline.

Activities and Projects

Submeowrine: *Developed and released an Android mobile application using Java and Android Studio that runs a 2D shooting game.*

Quiz Application: *Currently developing a quiz application using Flutter. The app aims to provide an engaging and interactive user experience with various quiz categories and a user-friendly interface.*

Commercial Management Website: *Developed a fully functional commercial management system to handle operations such as inventory management, sales tracking, and customer records.*

Flutter Development: Completed a Udemy course on Flutter, focusing on cross-platform mobile application development, including UI design, state management, and API integration.

Spring Boot Framework: Studied Spring Boot through a Udemy course, acquiring skills in developing scalable, Java-based applications with a focus on RESTful APIs, database connectivity, and microservices architecture.

Skills

Programming Languages: JavaScript, Python, Java, Dart, C, PHP, HTML/CSS

Technologies: Angular, ReactJs, NodeJs

Frameworks: Laravel, Symfony, Flutter

Databases: MySQL

Tools: Git, VSCode, Scrum

OS: Linux, Windows

Other: Data Science, Statistics

Soft Skills: Teamwork, Problem-Solving, Communication, Time Management, Adaptability

Languages

English: B2
French: B2
Arabic: C1
